INTRODUCTION

This bibliography lists selected articles, research reports, monographs, books, and reference works related to criterion-referenced measurement and was prepared in response to an increasing number of requests for current information.

The bibliography is limited primarily to material which deals directly with criterion-referenced tests and testing procedure; for example, research reports or commentaries. It also includes reports on computer-assisted test construction and the adaptation of criterion-referenced tests to individualizing learning and instruction.

References listed cover the period from 1965 to the present and were located through three primary sources: *Current Index to Journals in Education*, *Research in Education*, and the library collection at Educational Testing Service.

This bibliography follows normal practice in listing the citations alphabetically by first author, followed by title and other publication or availability data.
